

## REMARKS

### **I. Species Election Requirement**

In the Office Action dated November 9, 2010, the Examiner required an election between the following species (see page 2 of the office action):

- (1) species drawn to the use of the method in bronchoscopy interventions;
- (2) species drawn to the use of the method in angiographic imaging in catheter interventions;
- (3) species drawn to the use of the method in implantation of cardiac pacemakers;
- (4) species drawn to the use of the method in positioning of probes;
- (5) species drawn to the use the method in positioning of ablation electrodes;
- (6) species drawn to the use of the method for positioning of stents in vessels and bronchi; and
- (7) species drawn to the use of the method for checking the position of a catheter.

In response, Applicants elect the species drawn to the use of the method in bronchoscopy interventions (*see e.g.*, claim 16). Claims 1-16 and 23-30 read on the elected species.

The species election is made with traverse on the grounds that the search and examination of the different species is not unduly burdensome to the examiner. Applicants note that upon allowance of a generic claim, Applicants will be entitled to consideration of claims to additional species which depend from or otherwise require all of the limitations of an allowable generic claim. Office Action at page 3. Thus, Applicants presume that the species election is made to assist the Examiner in searching the invention.
